

To the English-speaking friends and supporters of our Peter-Hesse-Foundation –  
**a report from the 30-65-80-birthday invitation on 21. April 2017 and onward.**

After a short board-meeting of the Peter-Hesse-Foundation deciding on future positions on the Foundation-board, we gratefully celebrated our successful 30 years of Montessori teacher-training in Haiti, which was initiated in October 1986 by Carol Guy-James Barratt from Trinidad and me with 161 invited guests. We also celebrated Isa Hesse's 65th and my 80th birthday.

The guests donated € 12.175,64, which I rounded up to € 24.500,- for our EsF-AMI Montessori-project for deprived children in Haiti.

On 26 April, Carol flew back to Haiti, Isa and I to Iceland to participate in the third **SPIRIT OF HUMANITY Forum** with almost 200 actively and spiritually motivated participants from around the world. On Saturday, 29 April, I stumbled and fell with my head on the pavement. In the Icelandic hospital LANDSSPITALI in Reykjavik, the hole in my head was cared for with nine stitches, my hips X-rayed and then my left neck of femur was operated on, fixed with two long nails, all on that same day.

On 4 May, the German Red Cross flew me back to Düsseldorf, where – after a few initial days in a hospital – I was transported home into the caring hands of Isa and physiotherapeutic home-treatments. Since that time, I am fighting the pain with heavy medication and, of course, had to cancel most planned summer-activities.

"The purpose of the Peter-Hesse-Foundation (is) to contribute to a just and peaceful learning ONE world in diversity – with emphasis on providing children a chance through child-centered early education to enable life-long learning" is maintained in Haiti (and also in the Ivory Coast in Africa) under the leadership of Carol, the highly motivated directress or of the Peter-Hesse-Foundation in Haiti.

The other – overarching – Foundation's purpose for "a learning world" also develops well – not in Haiti but in London:

Supported by special Foundation-grants (humble "seed-money" – since 2014 from my repaid life-insurance), the special guest at our multiple April birthday-celebration, Dr. Rupert Sheldrake works on scientifically verifying his morphic-resonance hypothesis that **all is interconnected with all through learning.**

This research is proceeding well.

As soon as results are being published in a scientifically professional way, we, the Peter-Hesse-Stiftung, will also report about the results on our homepage [www.solidarity.org](http://www.solidarity.org) and on my new personal homepage [www.peter-hesse.info](http://www.peter-hesse.info)
